Relevant Experience

Freelancer (Freischaffender Künstler)

January 2020 - Present

- Write modern, performant and maintainable code for a crypto project on the Hedera network and maintain a game created from scratch.
- Work with different languages, platforms and frameworks such as TypeScript, Angular, Node.js and Python (Ren'py), but also tools like Figma (Wireframe/Mockup) and the Adobe Creative Cloud (Image/Video).
- Communicate with multi-disciplinary persons on a daily basis. For example coders, writers, animators and users.

Frontend Developer (Junior) @ Redox Interactive

July 2018 - September 2019

- Developed and maintained code for client projects primarily using AngularJS and Angular.
- Helped to create mobile apps using PhoneGap, now known as Cordova. Took part in minor tasks of the game-department like creating a dashboard or loading-screen (CSS).
- Interfaced with clients on a weekly basis. Participated in meetings of different clients (e.g.: Palfinger; global leading crane manufacturer) as part of the team.

DevOps / Software Tester @ JIPP.IT

February 2017 - Oktober 2017

- Tested sites in various browsers and mobile devices to ensure cross-browser compatibility, responsiveness and functionality. Manually and automated.
- Set up an automated webApp testing infrastructure using Capypara and Poltergeist in cooperation with the fellow DevOps.
- Maintained the develop- and build infrastructure. Enhanced server scripts.

Education

University of Applied Sciences FH Joanneum, Kapfenberg

Institute of Technology Tallaght, Dublin (semester abroad)

2014 - 2018
